

1 73. (New) An apparatus comprising:
2 at least one processor;
3 a memory coupled to the at least one processor; and
4 a web browser application residing in the memory, said web browser application
5 including a component download selection mechanism, said component download selection
6 mechanism dynamically creating a component download selection list when an HTML
7 document with a plurality of components is downloaded, said component download selection
8 mechanism prompting a user to select which of said plurality of components to download.

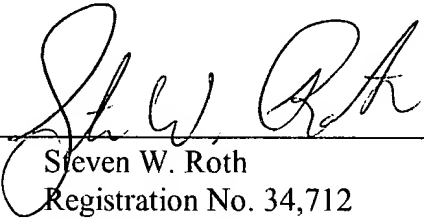

C/ 1 74. (New) A method for downloading an HTML document from a web server to a web
2 browser, the document including a document with references to a plurality of embedded
3 components, the method comprising the steps of:
4 a) requesting said HTML document from said web server;
5 b) parsing said HTML document for references to said plurality of embedded
6 components;
7 c) prompting a user to select which of said plurality of embedded components to
8 download by displaying a component download selection list on said web browser; and
9 d) requesting from said web server said selected embedded components.

Remarks

In section 3 of the Office Action, the Examiner rejects claims 1-37 under 35 U.S.C. §102(e) as being unpatentable over Foley et al. (U.S. Patent 5,706,502). Claims 1-37 have been canceled and claims 38-74 are now presented for examination.

Applicants submit that claims 38-74 are in condition for allowance and such allowance is respectfully requested. In addition, the Examiner is encouraged to contact Applicants' Attorney by telephone if there are outstanding issues left to be resolved to place this case in condition for allowance.

Respectfully submitted,

By:
